

What is claimed is new and desired to be protected
by letters Patent is set forth in the appended claims:

1. An article assembly comprising:

a) an article having a receivable end.

and

b) a stand in the shape of first and second feet,
each of said first and second feet being elongated
to define a toe end and together a common heel end,
said first and second feet being joined together and
positioned together to form a continuous bottom
supporting surface, said heel end of each of said
first and second feet being positioned together
to form a single heel portion, said single heel
portion including a recess extending through a
top side thereof and towards a sole thereof
for selectively receiving said receivable end
of said article therein, thereby retaining said
article when said stand is placed on a horizontal
surface, said first and second feet each including
a side surface, said side surfaces intersecting
one another in a common plain.

- AI
Contd.
2. The article assembly as claimed in claim 1, further comprising a base connected to a bottom side of said stand.
 3. The article assembly as claimed in claim 2, wherein said base includes a recess extending therethrough and in alignment with said recess in said stand for additionally receiving said receivable end of said article therein.
 4. The article assembly as claimed in claim 1, wherein said toe end of said first and second feet are at an acute angle to one another.

5. An article assembly comprising:

and

- a) an article having a receivable end.
- b) a stand in the shape of first and second feet and including a base on which said first and second feet are mounted, said first and second feet and said base each including a recess for receiving said receivable end of said article therein, thereby retaining said article when said stand and said base are placed on a horizontal surface.
